EXPERIENCE

Prompt Engineer (Green Rider Technology)

Sep 2024 - Mar 2025

- Crafted 100+ prompts to test and stress LLM responses, rating outputs on a 1–5 rubric scale to generate preference data that directly fed RLHF training pipelines.
- Promoted to Reviewer on select projects, auditing tasker-submitted prompts and ratings to catch rubric inconsistencies and errors before RLHF integration.
- Trained 10+ taskers and non-technical coders on writing high-quality prompts and structuring code-related prompts, improving average task rubric scores from 3.5 to ~4.0

EDUCATION

MBA in Analytics and Data Science, CGPA: 8.1/10

Jul 2025 - Present

Manipal University, Jaipur (MUJ)

Bachelor of Technology in Computer Science and Engineering, CGPA: 7.87/10

Oct 2021 - Jun 2025

Acropolis Institute of Technology and Research, Indore

SKILLS

- **Programming Languages:** Python
- **Technologies:** Excel, Power BI, Prompt Crafting, Prompt Engineering, RLHF
- **Database:** SQL (MySQL)
- **Tools/IDE:** Jupyter Notebook, PyCharm
- **Libraries:** Numpy, Pandas, Matplotlib, Streamlit
- **Concepts:** Statistics, Data Cleaning, Data Visualization, Exploratory Data Analysis

PROJECTS

Car Sales MMR Analysis

- Cleaned and engineered 501,166 wholesale auction records (89.8% retention from ~558K raw rows) using Python/Pandas, resolving data quality issues and creating derived features (price-to-MMR ratio, car age, condition category)
- Uncovered a \$51.9M pricing inefficiency by analyzing 500K+ transactions, finding financial/lease sellers priced vehicles 2.7-11.2% below market benchmark (MMR) depending on condition
- Identified vehicle condition as the strongest price driver (10.9 percentage point swing between Poor and Excellent) through hypothesis-driven EDA and multivariate analysis

AtliQ Business Insights 360

- Extracted and loaded raw SQL data files into Power BI, building a star-schema data model with defined table relationships
- Wrote 50+ DAX measures powering 10 KPIs spread across Finance, Sales, Marketing, and Supply Chain dashboard views for AtliQ Hardware
- Designed drill-through navigation from executive summary to department-level detail, enabling stakeholders to move from high-level KPIs to granular analysis

OTT Content Analysis

- Cleaned and transformed 119,000+ streaming records across 56 platforms and 16 countries using Power Query — splitting multi-value columns, removing invalid characters, and standardizing text
- Built an interactive Excel dashboard with PivotTables, PivotCharts, and slicers to analyze content distribution by genre, platform, and country
- Analyzed platform-wise content libraries and genre trends to identify the most popular genres and cross-platform patterns across 119,000+ titles

CERTIFICATIONS

- Data Analytics Bootcamp (Excel, SQL, Power BI, Python) — Codebasics
- Generative AI Leadership Professional Certificate — Coursera, Avg. Score: 93%

AWARDS AND ACCOMPLISHMENTS

- Placed in Top 10 of 100+ teams at a hackathon, IIIT Nagpur — solved a live problem statement within a fixed time constraint
- Won 1st place among 20+ teams in a UI/UX competition, Manipal University Jaipur — designed a complete website prototype
- Trained 100+ students on Prompt Engineering as an IEEE member
